Online Workshops by ORBIS – Microsoft Power BI

S(mall) I M(edium) I L(arge) – how it suits YOU

Identify trends early and achieve business goals efficiently and effectively.

Do you want structured data in order to perform accurate data analysis? Is your goal to retrieve information about your business data from any place and at any time in order to speed up decision-making, among other things?

Structured and properly visualized, you can identify the right trends early. Based on Microsoft Power BI, the modern business analytics tool from Microsoft, we have developed various online workshop formats for you.

We offer the following formats:

Microsoft Power BI – S(mall) Package (3 days)
- 3-day online workshop
- Start Smart with Power BI

Microsoft Power BI – M(edium) Package (4 days)
- 4-day online workshop
- Deeper analysis of your company-relevant key figures

Microsoft Power BI – L(arge) Package (5 days)
- 5-day online workshop
- Integrate Power BI into other departments

Online Workshops – Overview

Advantages

- Rapid deployment of a powerful standard BI solution
- Comprehensive data analysis and appealing data visualization
- Work in a familiar environment
- Overview of key figures in times of crisis
- Team collaboration from any location
- Use of Power BI Apps

Services

- Power BI presentation
- Technical facility
- Remote online workshop
- Workshop documentation
- Provision of all documents

Target group

- CIO / CEO
- IT Manager and Consultant
- Employees of specialist departments
  - Sales
  - Service
  - Marketing

- Interaction of visuals and tooltip
- Publishing concept - App vs. workspace publishing
- Role concepts of workspaces (viewer, administrator, etc.)
- Bookmarks
- DAX
- Power BI tabs in TEAMS
- Streamanalytics

Microsoft Power BI – S(mall) Package (3 days)

Process

Day 1 – Initial meeting: Reconciliation / technical requirements / overview

During our initial meeting together, we will determine the approach for the workshop:

- Course of the 3 days
- What are the goals to be achieved?
- What is your expectation? (Definition of your KPIs)
- What technical requirements do you bring with you?

The initial meeting is the basis for the following days and activities. These are documented and made available to you.

Day 2 – Data modeling and report generation

- Interactive creation of Power BI content
- Data visualization in Power BI Desktop according to your requirements (bar charts, pie charts or tabular views)
- Use and deployment of additional filter functions and formatting options

By the end of the second day, you will know how to create reports and take advantage of the different visualization options.

Day 3 – Dashboards and authorization concepts

- Creation of new text and calculation fields
- Publish Power BI reports to your personal Power BI Cloud
- Creation of individual dashboards
- Configuration of scheduled refreshes using Power BI Gateway and „Scheduled Data Refresh".
- Get to know user permissions in Power BI Service and role concept for Power BI reports
- Share Power BI content with other team members / external users

In Day 3, you'll learn all about access permissions, the concept of publishing and sharing Power BI content, and creating dashboards.

Costs

Costs for online workshop:

€ 3.900 I max. 4 participants

Lizenzkosten:
- Power BI Desktop free to use
- Power BI Pro €8.40 per month (trial version valid for 30 days)
- Power BI Premium – on demand

We would be happy to discuss your goals, requirements and questions in a personal online meeting:

Microsoft Power BI – M(edium) Package (4 days)

Process

The flow of this workshop deepens and expands the insight and scope from the „S(mall) Package" workshop. The contents can also be individually coordinated and adapted here. In addition, the selection of topics on the 4th day will be expanded and designed according to your requirements. The level of knowledge of the participants should be the same to ensure efficient implementation.

Day 1 – Initial meeting: Reconciliation / technical requirements / overview

During our initial meeting together, we will determine the approach for the workshop:

- Course of the 4 days
- What are the goals to be achieved?
- What is your expectation? (Definition of your KPIs)
- What technical requirements do you bring with you?

The initial meeting is the basis for the following days and activities. These are documented and made available to you.

Day 2 – Data modeling and report generation

- Interactive creation of Power BI content
- Data visualization in Power BI Desktop according to your requirements (bar charts, pie charts or tabular views)
- Use and deployment of additional filter functions and formatting options

By the end of the second day, you will know how to create reports and take advantage of the different visualization options

Day 3 – Dashboards and authorization concepts

- Creation of new text and calculation fields
- Publish Power BI reports to your personal Power BI Cloud
- Creation of individual dashboards
- Configuration of scheduled refreshes using Power BI Gateway and „Scheduled Data Refresh".
- Get to know user permissions in Power BI Service and role concept for Power BI reports
- Share Power BI content with other team members / external users

In Day 3, you'll learn all about access permissions, the concept of publishing and sharing Power BI content, and creating dashboards

Day 4

The following topics can be discussed or worked on in the workshop on the 4th day:
- Unify self-service and enterprise analytics capabilities
- Faster preparation of Big Data with Azure
- Integration of Power BI in Dynamics 365
- Real-time analysis updates
- Publishing concepts
- **... your individual topics**
- **... topics from the "Other available selections - page 2"**

Costs

Costs for online workshop:

€ 4.900 I max. 4 participants

Licensing costs:
- Power BI Desktop free to use
- Power BI Pro € 8.40 per month (trial version valid for 30 days)
- Power BI Premium – on demand
